- ④ Plug

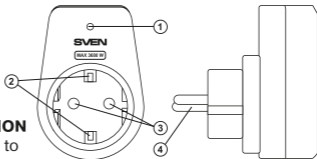

Fig. 1

PREPARATION AND OPERATION

- Connect the surge protector to 230 V mains.

- Connect required electrical appliances to the surge protector socket. The load must not exceed 3680 W.

- Lighting indicator means the protection circuit serviceable condition.

SAFETY PRECAUTIONS

- Do not connect simultaneously the load to the surge protector with total power more than 3680 W, as well as powerful heating appliances.

- Connection of the surge protector to a non-sinusoidal voltage source, such as UPS, is not recommended.
- It is recommended to connect the surge protector to a grounded socket.
- If the protection status indicator is out of order, the surge protector should be replaced it with a new one.
- When signs of failure are found (for example, the output voltage absence in a socket), mechanical damages, high temperature of the item or the odor, the item must be disconnected immediately from the wall socket and you should address to a service center.
- Do not open and never attempt to repair the item by yourself, it should be repaired by qualified persons only.
