User's Manual

Connecting the keyboard to a PC

- Make sure the PC you are connecting the keyboard to is equipped with a Bluetooth receiver. Otherwise, you will need to purchase and install a Bluetooth dongle.
- Activate the Bluetooth feature in the settings of your PC, and then choose «Add a new Bluetooth device» (command name may vary depending on the operating system and its version).
- Your PC will start searching for Bluetooth devices and display the list of detected devices.
- Shift the keyboard power switch into the ON position. Press buttons Esc and K simultaneously and hold them down for 5 seconds. The keyboard will appear in the list of the detected Bluetooth devices.
- Select the keyboard in the list. You'll be asked to enter a passkey in the window on the display. We recommend that you select "no passkey".
- If the keyboard is successfully connected, it displays in the list of active Bluetooth devices. Now you can close the installation program window.

Connecting the keyboard to a mobile device (iPhone/iPad, etc.)

- Activate the Bluetooth feature in your mobile device. It will automatically start searching for available Bluetooth devices.
- Shift the keyboard power switch into the ON position. To make a wireless connection, press buttons Esc and K simultaneously and hold them down for 5 seconds. The keyboard is ready to connect.
- As soon as your mobile device detects the keyboard, you'll see «Bluetooth 3.0 keyboard» in the list of available Bluetooth devices.
- Choose the keyboard in the list. Then, using your keyboard, enter the suggested passkey in the corresponding window and press the Enter key. Now the keyboard is connected to your mobile device.

Notes:

- **Verify that the distance between the devices connected is no more than 10 m.**
- **If powered on but not used, the keyboard enters the energy-saving Sleep mode. To wake the keyboard, press any key.**
- **After using the keyboard, mind to switch off the power with the ON/OFF switch on the bottom panel.**

5. DESCRIPTION OF SHORTCUT KEYS FUNCTIONS*

Fn+ESC: start media player	FN+F10: virtual keyboard
FN+F1: play/pause	FN+F11: go to search page

FN+F8: lock screen	FN+Home: go to the page up
FN+F9: black screen	

* Use of keys depends on the connected device.

6. TROUBLESHOOTING

Problem	Solution
The keyboard is not working.	<ol style="list-style-type: none"> 1. Make sure the connected Bluetooth dongle is not damaged and the Bluetooth feature is on. 2. Check the batteries charge level. Replace them with new ones if necessary. 3. Repeat the Bluetooth connecting procedure. 4. If there are several Bluetooth sources connected, make sure the connection speed is enough. 5. Return to default settings by pressing Esc and K buttons simultaneously. 6. It's recommended that you address your nearest service center.

If none of the above methods can solve the problem, please seek professional advice at your nearest service center. Never attempt to repair the product yourself.
