#### 5. INSTALLATION

- Open the cover of the mouse battery compartment (⑤), insert one AA type battery into the battery compartment matching the polarity, and close the cover of the battery compartment (see Fig. 4).
- Connect the included nano receiver (⑥) to a free PC USB port (Fig. 5).

- To activate the mouse, press any button of the mouse or turn the scroll wheel. If the mouse is connected correctly, it will turn on automatically.

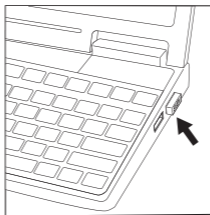

Fig. 5. Receiver connection

- After finishing work you can pull out the receiver ⑥ from the PC USB port and insert it into the mouse (Fig. 6). When using the receiver again, pull it out from the mouse and connect it to the PC USB port again.
- Do not place the receiver into a confined metal space (table drawer, box, safe), as a metal screen does not transmit radio signals.
- If the battery runs down, the mouse works in jerks. It means that the battery should be replaced with new one, as it is shown in Fig. 4.
