- After finishing your work, shift the Power on/off switch ④ back to the Off position. Then take the nano receiver out of the USB port and insert it back into the mouse. (Fig. 7).
- Do not place the receiver in a metal confined space (table drawer, box, safe), as a metal screen does not transmit radio signals.
- If the batteries run down, the mouse works in jerks. It means that the batteries should be replaced with new ones, as it is shown in Fig. 4. Always install only identical new batteries.
